

The Calgary double door illuminated LED mirror cabinet features a built-in shaver socket and a USB charging port. Externally, the cabinet has mirrored panels to either side for a sleek look.

The diffused illuminated border to the front of the cabinet provides a uniform light output with no dark spots. The Tunable function enables users to choose the most suitable colour temperature for their décor or individual preference, warm white, natural white or cool white. It can also be dimmed to create the desired ambience.

Internally, there are three adjustable glass shelves to store bathroom accessories, and a mirrored panel on the internal door.

The mirror stays fog free due to the built-in demister pad, which switches off automatically after 30 minutes. The mirror also has an IP44 rating making it suitable for use in a bathroom environment.
