

The popular Sirius LED Cabinet Light range is now available in Tunable White.

Tunable white enables the user to choose their desired colour temperature, from warm white (3000k) to natural white (4000k) to cool white (6000k) by simply using a hand held remote control, or from a smartphone or tablet using a free downloadable app (Receiver now features built in Wi-Fi capabilities).

This product also utilises smooth dimming technology, so the unit can be set to totally suit customer requirements. Receivers on other tunable products (EG Tunable LED Strip SY2450) can be linked to one remote.

Power converter and receiver required (Included in kits). Remote control required, purchased separate.

The Technical Spec...
