

The Solas mirror is battery operated, by using the removable battery pack on the side of the mirror. The lithium battery pack is easily removed for charging via a USB cable (not included).

The mirror is switched on using the button on the side of the mirror, for battery saving the mirror will switch off automatically after two minutes if it senses no further movement.

Battery takes 6—7 hours to recharge from empty to full charge.

The mirror features a natural white LED panel to the top of the mirror.

Also available in 500mm (w) x 700mm (h) (SY9701/2)

-  390mm (w) x 500mm (h)
-  IP44 Rated
-  Natural white (4000K)
