### IMPORTANT—Please read prior to installation

- 1) Please read these instructions carefully before commencing any work
- 2) This product must be installed by a qualified electrician in accordance with the current IEE wiring regulations
- 3) To prevent electrocution switch the power off at the mains supply before installing or maintaining this fitting
- 4) Ensure others cannot restore the electrical supply without your knowledge
- 5) The PSU must be rated 12VDC and be compatible with the pre-wired connector system of this product
- 6) Never exceed the wattage stated

### INSTALLATION & OPERATION

- 1) The diagram below indicates how to connect the sensor switch to the LED driver and lighting circuit.
- 2) If the cables are to be hidden it will be necessary to drill 2 x 10mm holes into the furniture. These holes are subsequently hidden by the body of the sensor switch.
- 3) The switch itself is secured onto the furniture using the 2 screws supplied.
- 4) Locate switch in suitable location and connect as per line drawing.
- 5) Lights are operated by passing hand within 25mm of the sensor switch.
