

The shower fan kit is a highly reliable fan in a modular design for ease of installation and maintenance. The inline fan is designed to provide extraction levels that comply with the latest building regulations.

The fan is manually operated by a remote switch (Switch not supplied). This version also features a timer control. Install in-line with ducting for a quiet and discreet installation.

This in-line fan comes with a fixing bracket and is compact, attractively styled and ductable over short lengths. It is an ideal solution for removing damp moist air, odours and airborne pollutants from toilets and bathrooms.

NB always pull flexible ducting taught to ensure installed performance airflow.

KEY FEATURES

- Axial in-line fan
- Ventilation up to 108 m³/hr
- Designed for ventilation/lighting above shower cubicles
- Use for both supply or extraction
- Compact and quiet in operation
- Mounting bracket included
- Ductable
- Halogen lamp option
- IPX4 rating
- 3 year warranty

Kit contains fan with timer, 3m flex duct, ties, LED lamp in natural white or cool white, chrome and white grilles, external grille.

Part Numbers	Description
SY7688A/4000K	Shower Fan Kit with 4000K LED lamp
SY7688A/6000K	Shower Fan Kit with 6000K LED lamp

The Technical Spec....	
Airflow m ³ /hr* / 1/sec*	108/30
Fan Type	Axial
Controls	Timer (Adjustable)
Mounting	In-line
Sound pressure d B (A) @ 3M	39
Power watts	16
Amps	0.01
Specific fan power	0.53
Duct diameter	100
Voltage	230v/1ph/50Hz
Rating	IPX4
Material finish	ABS
Weight (kg)	0.41
