

Thank you for purchasing this SycamoreLED.com product. Please make sure instructions are followed carefully prior to and during installation and product is not altered, otherwise warranty may not be valid. For technical support or warranty information please visit www.sycamoreLED.com, or call our dedicated technical helpline +44 (0) 113 2866686.

IMPORTANT—Please read prior to installation

- 1) Please read these instructions carefully before commencing any work
- 2) Please retain these instructions for future reference

DIAGRAMS

INSTALLATION INSTRUCTIONS

1. Cut out 100—102mm diameter hole in the work surface ensuring that the subsequent operation of the unit will not be obstructed
2. Apply a bead of silicon around the hole to create a watertight seal between the work surface and the module.
3. Remove the locking ring from the collar by turning in an anti-clockwise direction
4. Locate the module into the hole
5. Place the locking ring onto the collar and turn clockwise to tighten against the underside of the work surface. Do not over tighten
6. The second locking ring should be fitted to the bottom of the collar. This helps to provide extra rigidity.
7. Note: The module can also be fitted to the underside of a wall cabinet. The same installation procedures apply.
8. Connect the cable into a relevant power supply using the pre-wired 3 pin plug

OPERATION

1. To use the Power Tech Module, press the lid and the unit will automatically release from the collar. Gently pull up the unit with the lid until it clicks and locks into position.
2. The unit is now ready to use.
3. To close the unit, gently press down on the lid so that the unit disengages from the locking mechanism, and then push into the closed position, ensuring that the lid sits flush within the collar
4. If the Module is difficult to lift and push down try loosening the locking rings slightly.

CARE IN USE

1. Always disconnect the power prior to cleaning
2. Do not use chemical cleaning products as it may damage the finish
3. Wipe over with a soft cloth

N.B. It is strongly recommended that this unit is installed by a qualified electrician
