

FEATURES

The new uncoated 5m reel of LED strip is available in either warm, natural or cool white, The strip is provided in a 5m reel with a 2m distributor cable with pre-wired Molex connector attached to each end. This allows a fast fit connection to the Sycamore PSU range. This offers a labour cost saving due to the time saved in connecting the strip to the driver. either end, which enables users to use the remaining strip once it has been cut. There is also a clamp connector/cable that can be used to connect to any off cut from the strip. The strip features cut marks every 85mm and has an IP20
