- 2) It is strongly recommended that this unit is installed by a qualified electrician
- 3) To prevent electrocution switch the power off at the mains supply before installing or maintaining this fitting
- 4) Ensure others cannot restore the electrical supply without your knowledge
- 5) The PSU must be rated 12VDC and be compatible with the pre-wired connector system of this product
- 6) Never exceed the wattage stated

IMPORTANT

Bare off 10mm of the PVC oversheath & terminal the cable as shown

red cable to CW
black cable to V+ (either port can be used)
black with grey line to WW

INSTALLATION

Overview

The fitting is based upon the standard Sirius cabinet light, however within the fitting there are warm and cool white LEDs. When used in conjunction with the 4 zone tunable receiver/remote the colour temperature of the light can be changed from warm-cool white and vice versa. When purchasing you will need the lights, cable distributor, tunable receiver, remote control and driver.

Installation

Ensure 240v supply is isolated prior to installation.

- 1) Install the driver (see driver for installation)
- 2) Connect the receiver SY7699 to the distribution block on the driver via the connection plug on the receiver
- 3) Wire the cable distributor SY7893 to the receiver (see diagram)
- 4) Plug the lights into the slots on the distributor cable
- 5) Address the receiver to the remote control (see instructions supplied with the receiver/remote)
