IMPORTANT—Please read prior to installation

- 1) Please read these instructions carefully before commencing any work
- 2) Please retain these instructions for future reference
- 3) It is strongly recommended that this unit is installed by a qualified electrician in accordance with the IEE wiring regulations and building regulations
- 4) To prevent electrocution switch the power off at the mains supply before installing or maintaining this fitting
- 5) Ensure others cannot restore the electrical supply without your knowledge
- 6) The PSU must be 24Vdc rated and compatible with the pre-wired connector system of this product
- 7) Locate driver (IP20) in an unclassified zone
- 8) Never exceed the wattage stated

DIAGRAMS

INSTALLATION

- 1) Remove the trim ring from the light and lift the LED light out of the surface mounting ring (without completely removing wire).
- 2) Position mounting ring into the desired location. Ensure the wire for the LED light is positioned in the wire groove of the surface mounting ring.
- 3) Attach surface mounting ring to medium using the screws provided. Pull the excess wire through the wire notch, then re-attach the LED light to the surface mounting ring.
- 4) Connect the trim ring to the LED light magnet tabs. Attach wire evenly to surface medium with mounting hardware.
- 5) Place driver in desired secured location.
- 6) Once assembly is complete, turn on power to confirm fixture is working properly.

CARE IN USE

- 1) Please note this fitting has non replaceable parts
- 2) Always switch off or disconnect from the mains when cleaning the product.
- 3) We recommend cleaning with a soft dry cloth. Do not use scourers, abrasives or chemical cleaners.
- 4) For your safety, this fixture must be wired in accordance to local electrical codes and ordinances. All work should be done by a qualified electrician.
