

\* NEW Copper finish for Summer 2023

Choose from 3000K, 4000K or 6000K by simply selecting your preference using the integrated switch on the fitting. It is fully dimmable from most standard wall dimmers and also includes the power converter. The light output is equivalent to a 50W GU10 halogen lamp, but due to the latest LED technology it uses 85% less energy, helping to save money and the environment. The fitting is designed to allow loft insulation to be continuously run over the back of the fitting (IC Rated) and features a loop-in loop-out clip block.

| Technical Information  |   |
