

FEATURES

This new tunable white LED strip can be changed from warm white, to natural white and to cool white by simply using the remote control and receiver system listed below. On average each metre of LED strip provides an impressive 720 lumens, however, we have a more powerful version available upon request if required. Each reel comes complete with 2 x 1.5m cables on either end, and a 2m power lead is also available if required.
