

FEATURES

The LED strip is part of the SycamoreLED.com "Superior Range" strip is available in either warm or natural white strip is provided in either 1M, 2M or 3M lengths with a 2m soldered cable. This allows a fast fit connection to the Sycamore range.

This offers a labour cost saving due to the time saved in connecting the strip to the driver.

either end, which enables users to use the remaining strip once it has been cut.

There is a VHB (very high bond) adhesive attached to the strip. The strip features cut marks every 25mm and has an IP65 rating.
