

The touch dimmer is compatible with all of our 24Vdc lighting ranges. It offers a simple plug and play connection system, so lights can be controlled from a single switch. The unit incorporates a soft blue light to aid location in the dark and a surface mounted fixing method via 2 screws, which are hidden by the clip on a brushed nickel fascia plate.

The unit includes a connection for one light. A 12 way distribution block can be purchased separately if required.
