

### FEATURES

The Sirius LED Link Light is a perfect alternative to fluorescent link lights. The link lights come complete with a diffused cover and have no visible LED points which provides a wide flood of light. The fittings are individually switched and fully linkable for ease of use, and can be butt jointed to make longer lengths if desired.

Now available in warm white or natural white.

All lights will be supplied **with a** mains cable, and will include the fixing kit, butt connector and the re-wireable connector.
